Scoring Rationale

A player must play in 75% of his team's total rounds in order to be eligible for Georgia Cup honors.
 Scores are adjusted by the number of Georgia Cup teams participating.
 If all four teams are participating each round is factored in three times.
 If only three of the Cup teams are participating the scores are used twice.
 If only two of the four Georgia Cup teams are participating in a tournament the scores are used once.
 If only one Georgia Cup team is participating it is not a Georgia Cup eligible tournament.
